

Calendar of Events

October 2, 2025
- October 4, 2025

International Lameness Prevention Conference (21 CE)

Antlers Hotel

4 South Cascade Ave

Colorado Springs, CO 80903

09:00 AM - 05:30 PM MST

Kerry Haugh, 5073271161

kerry1161@gmail.com

Clinicians will include Josie Gramm, Jeremy Alltop, DVM, Chris Wiggins, Richard Armentrout, Stuart Muir, Blane Chapman, Pete Mays, Jake Keller, Kirstin Becker, Shawn Melton, David Nicholls, Ross Keller, Michael Hupp, DVM, Jeff Coda, Paige Poss, Kerry Haugh.

Day 1 12:30- 7pm

Day 2 9am-5:30pm

Day 3 9am-5:30pm

October 3, 2025
- October 5, 2025

IAPF Fall Farrier Expo (17 CE)
Missouri Forget-Me-Not Horse Rescue & Sanctuary
981 Heritage Road
Linn Creek, Mo 65052
02:00 PM - 05:00 PM CST
Mark Male,
markmalehorseshoeing@gmail.com
Event Description:

Join the International Association of Professional Farriers (IAPF) and Missouri Forget-Me-Not Horse Rescue & Sanctuary for the Fall Farrier Expo, taking place October 3–5, 2025. Sponsored by Glue-U Adhesives and Werkman Hoofcare, this three-day educational event brings together farriers, veterinarians, and equine professionals for a dynamic lineup of presentations, live demonstrations, and hands-on workshops.

Kick off Friday afternoon with a series of engaging one-hour presentations featuring industry experts covering topics from shoe modification credentials to GluShu applications and veterinary insights.

Saturday is Demonstration Day, where you'll observe live demos including advanced shoeing techniques, glue-on technology, and collaborative vet-farrier care approaches—plus an interactive lunch break for networking.

Sunday wraps up with small group, 30 minute hands-on sessions rotating through specialized stations for in-depth learning and practical skill-building with each presenter.

Whether you're looking to expand your technical knowledge or connect with professionals in the field, the Fall Farrier Expo offers valuable continuing education in a supportive and collaborative environment.

October 4, 2025

Sweet River Equine Clinic, Inc. (6.5 CE)
Sweet River Equine Clinic, Inc.
200 Weyer Rd
Modeseto, CA 95357
08:00 AM - 05:00 PM PST
Brianna Esau, (209) 324-1249
briannasweetriver@gmail.com

We will have Doug Russo here on October 4. Our entire staff works that day to make sure the event is very efficient and professional for the farriers. We coordinate with clients and outside sources to secure horses to use to demonstrate on during the event. Please let me know if you have any further questions. See flyer for additional information.

October 4, 2025
- October 5, 2025

Farrier Study & Skills Open House (16 CE)
Pacific Coast Horseshoeing School
5225 Carbondale Rd
Plymouth, Ca 95669
08:00 AM - 05:00 PM PST
Amanda Smith, 6617540344
amandasmithfarrier@gmail.com

Pacific Coast Horseshoeing School Inc., Horse Education Online Inc.

This is an open house event. We will cover academic study, shoe making, shoe shaping, business and entrepreneurship, and any other topic attendees may want to cover. Pacific Coast Horseshoeing School will make its facility and instructors available from 8AM to 5PM for this purpose. There is no specific time/hours as what we will do each day depends on what attendees want to work on.

October 12, 2025

A Fresh Look at Heel Anatomy (3 CE)

11:00 AM - 02:00 PM EST

Kathy Coleman,

barefoot@progressivehoofcare.org

Deep within the hoof capsule, a single convergence point of the wall laminae, bar laminae, and sole corium marks the anatomical heel. This area is essentially the “internal seat of corn”. Common anatomical variations occur with different heel shapes. Meticulously taken images will help us explore how these structures can be affected and change shape by various factors, such as load on the hoof, compensatory stance, conformation, and environment. Exploring some of the most common changes may provide a better understanding of how to effectively trim various heel types.

Presenter

Paige Poss has dedicated over 25 years to the hoof care industry, where she specializes in trimming horse hooves, conduction distal limb anatomy studies, and creating educational materials. Holding a BS degree in Animal Science from North Carolina State University, Paige initially ventured into the field as a lab tech at various research facilities. However, her journey took a turn in 1999 when a lame horse ignited her passion for hoof care. In collaboration with her business partner, Jenny Edwards, Paige co-founded Anatomy of the Equine, LLC, a platform that publishes and sells education materials tailored for farriers and veterinary professionals. Paige’s unique approach blends her love for photography, science, anatomy and art. Her fascination with hoof and horse anatomy has led her to dissect and photographically document hundreds of lower legs and even whole horses.

Her most impactful dissection images, to date, focus on the palmar digital nerve as it descends deep into the hoof capsule. In 2020, Paige stepped back into the academic field and was asked to set up and manage the anatomy lab at the new University of Arizona College of Veterinary Medicine. She worked in this lab from 2020-2022 before returning to trimming and lecturing independently. As of 2024, Paige has delved into researching Equine Metabolic Syndrome as a lab tech at the University of Arizona. Paige’s unwavering commitment to understanding hoof mechanics, coupled with her technical skills, positions her as a trailblazer in the industry. Her dissections and clinics provide a creative and encouraging platform for others to explore hoof mechanics. Through her passion for teaching, Paige creates powerful images that not only educate but also inspire a deeper appreciation for the intricate world of horse anatomy. Paige continues to actively participate in clinics and speaking engagements, sharing her wealth of knowledge and experience. Currently residing in the Sonoran Desert in Tucson, AZ, Paige shares her home with her husband, cats, dog and horses.

WHEN Oct 12, 2025 - 11:00 am (EDT)

COST \$50 PHCP member, \$90 non-member

RECORDING AVAILABLE for 6 months

October 15, 2025

Central Carolina Farrier Rounds (3 CE)

See attached description

, NC

06:00 PM - 09:00 PM EST

Joe Eisen, (919) 408-7268

joe.eisen@outlook.com

Third Wednesday each month, so for 2025: 3/19, 4/16, 5/21, 6/18, 7/16, 8/20, 9/17, 10/15, 11/19, 12/17.

Central NC clinic location rotates monthly, including Chapel Hill, New Hill, Southern Pines, Wake Forest. See monthly announcement in <https://www.facebook.com/groups/978968283546217>

A DVM/Farrier/Owner Team provides an equine case in need of podiatry-related ideas. The examinations, radiography and dinner are gratis; the owner makes their own financial arrangement with their farrier. The meeting is from 6 PM to 9PM. While everyone is settling in & getting some food and drink there is a general topic of discussion for farriers and veterinarians' joint interest. For example, on 10/19/2023 the presentation and discussion was on considerations for shoeing for landing versus loading.,

Then, the horse's owner, veterinarian and farrier provide a medical history. The group will observe the horse in motion in the aisle, arena and/or driveway. Next the group does a podiatry examination followed by Dr. Radkin doing podiatry radiographs for the group to discuss. Then a trimming and possible shoeing plan is discussed. The consensus plan approved by the owner and the owner's farrier is then accomplished by the owner's farrier. Follow-up radiographs will be discussed. There will be one case each evening. The end time is no later than 9PM.

The goal is to see how farriers and equine practitioners work together on a particular case that can then translate to other cases.

October 15, 2025

PHCP Wear Patterns, What They Really Mean - Part 1 (2 CE)

11:00 AM - 01:30 PM EST

Kathy Coleman,

barefoot@progressivehoofcare.org

Approved for 2 CE for each part, for a total of 4 CE.

Wear Patterns, What They Really Mean

This two-part webinar series introduces a protocol for establishing patterns of movement and wear patterns.

Part 1 – Hoof Wear Patterns and How to Create a Schematic

How do we know what effect our trimming has on equine hooves? In this session Nick Hill will introduce a protocol for establishing how our trimming affects equine hooves and movement. The protocol is extremely simple and efficient to use with a mobile phone, camera, or pen and paper. Nick will teach how to educate horse owners about the protocol so they are able to produce schematics and monitor their own horses. The protocol is a tangible tool that will help vets with lameness issues and when used on a regular basis acts as a record to validate your work.

Part 2 – How to Use the Schematic and Validate Your Work

Once you have established patterns of movement it becomes easier to detect any abnormalities and identify and treat problems before they become serious. This session revisits and expands on the protocol taught in Part 1. Nick's protocol will maximize the efficiency of biomechanics and reduce strain and stress on the horse.

Presenter

Nick Hill is a natural hoof care practitioner. His training started with the use of shoes for horses in June 2003 when he began working alongside qualified FRC farriers who taught him the Cytek method. He was a farrier with Cytek until 2006, when his training suddenly took a drastic turn because his feelings about hoof care resonated with Jaime Jackson's work and research on wild horses. In March of the same year he started training with the AANHCP training program. Along with Jamie Jackson, Nick's mentors include Todd Jaynes and Richard Dewry. Nick has traveled and shadowed other practitioners around Europe (Italy, France and UK). In 2009 he accepted placement in the Board of Directors for the AANHCP alongside Jaime Jackson, Bruce Nock, Ann Corso and Richard Dewry. Nick is a registered instructor with Liberated Horsemanship. He has taught clinics in Europe, Africa, America, and Israel teaching professionals and horse owners to understand a different way of managing and maintaining their equines. V&T Equine Services aims to help anyone in the world through their clinics and educational offerings.

Sign up

Parts 1 and 2 are included in the price. The recording of this webinar may be purchased and viewed as many times as you would like for two years.

Upon purchase of the webinar, you will receive the zoom link via your invoice. Members can also access the Zoom recording links via their account by logging into the website, clicking on the "Menu" dropdown, and then clicking on "Your Orders".

The Humble Hoof Podiatry Clinic (13 CE)

49 Fern Ave

Amesbury, MA 01913

09:00 AM - 05:00 PM EST

Alicia Harlov, 7742660715

thehumblehoof@gmail.com

This Podiatry clinic will include both lectures and hands on work with assessing biomechanics, hoof balance, body compensations, and therapeutic hoofcare options. The morning will consist of lectures from the clinicians, while the afternoon we will break into small groups to learn individually with the clinicians through demos and hands on work. Participants will be broken into small groups and rotate through hands on demos with the 3 clinicians throughout the weekend. To register, see thehumblehoof.com/product/clinic

2025 Silver Jubilee NO Laminitis! Conference (25 CE)

Via Zoom

08:00 AM - 05:45 PM CST

Nancy Collins, 603-986-8938

ncollins@ecirgroup.org

Virtual via Zoom. Live event with recordings for future view. See attachment for further details.

The US alone has almost 10 million horses. The most current estimates are that 10% to 15% of horses will suffer from laminitis every year. In the US, that is 1 million horses per year. The ECIR Group has been there to help caregivers and their equines for 25 years, researching, educating, and helping equines negotiate rehabilitation from or avoidance of debilitating laminitis.

The 2025 Jubilee NO Laminitis! Conference will be a special celebration of the 25 years that the ECIR Group has remained the largest field-trial database for Pituitary Pars Intermedia Dysfunction (PPID) and Equine Metabolic Syndrome (EMS)/Insulin Resistance (IR) in the world, dedicated to the quest of helping metabolic equines. Attendees will welcome the latest in research and proven protocols used to improve the welfare of equines in their care. Join the ECIR Group, Drs. Kellon, Bowker, Gustafson and 10 top-level equine researchers and professionals in the ECIR Group Virtual Conference Room via Zoom[®] offering three days of information live, and with recordings for future review.

PHCP Anatomy, Trimming and Hoof Protection ? Tennessee (24 CE)

Magna Vista Farm

09:00 AM - 06:00 PM EST

Lorie Fleenor,

bdfandltf@gmail.com

Approved for 8 CE per day for a total of 24 CE

This three-day clinic fulfills the beginner series clinic requirement for PHCP students.

Anyone can attend, you do not have to be a PHCP member.

Days 1 and 2 will cover anatomy and trimming.

Day 3 will cover pathology, hoof protection and shoe removal.

Some of the topics covered include the following:

- Basic distal limb anatomy*
- Exploration of anatomy through cadaver trimming and dissection*
- Shoe removal for ease and comfort to both horse and trimmer*
- Transitioning to barefoot*
- Alternative forms of hoof protection*
- Fit and use of a variety of hoof boots, based on performance, rehab or rider needs (glue on protection is not included in this clinic)*
- How and when to use hoof casting*
- Which padding options to utilize for various pathologies and rehab needs*
- Casting and booting on cadaver limbs*

Prerequisite

Read through the PHCP Introduction to Equine Diet and Lifestyle.

Study the PHCP Introduction to Equine Hoof Anatomy.

Visit Anatomy of the Equine to get familiar with the distal limb anatomy before you attend the clinic. Consider purchasing online coursework and ebooks.

What to bring

Most of this clinic will take place in a heated shop. A small portion of the time will be in the barn working with live horses, so please dress appropriately. Bring a chair or let me know if you need one. Bring your trimming tools if you are able, an apron or towel for your lap, gloves and safety glasses.

If you have a cadaver leg of your own you would like to dissect with us please let us know and bring it along.

There will be a one hour lunch break. You may bring your own lunch to eat on location or there is a diner 3 miles down the road.

Accommodations

I highly recommend staying in downtown Bristol for the best food and entertainment options. However, there is a B&B large enough for people to share across the fence from my farm (walking distance to my shop). There are also cheaper hotel options 20 minutes away with food close by. Three options on West State Street, Bristol, TN and two options on Linden Drive, Bristol, VA.

Travel

People should consider flying into TRI airport and be prepared to rent a car. We are in the country so Uber will be expensive or unrealistic.

Start time is 9:00 am each day and we'll finish up between 4:00 and 5:00 pm.

Lorie Fleenor, PHCP practitioner, mentor and clinician, is an 8th generation farmer in Bristol, TN. Knowledge of animal welfare has always been a priority for Lorie, and whole horse hoof care has been her passion since she first learned to trim in 2007. She continues her education so that she can better help people and horses find a pathway to health and happy trails. Each year, Lorie hosts multiple clinics at her ranch for riding and hoof care, and is very active in her local horse community. Her husband and two children help her on the farm where they run a 265 head cattle operation, board and care for 75 horses, teach riding, and offer training services. She serves clients in Southwest VA and Northeast TN. She has a huge variety of horses, hooves, and pathologies on her farm. The horses live out 24/7 in herds on hilly pastures, so it's fun to watch rehab and healthy hooves happen as new horses come in! As we all know, diet, exercise and the trim go hand in hand!

Lorie can be contacted at Magna Vista Farm in Bristol, TN (bdfandltf@gmail.com).

Sign up at

<https://progressivehoofcare.org/2025/05/anatomy-trimming-and-hoof-protection-tenness-ee/>. Member pricing is for PHCP members only

November 15, 2025
- November 16, 2025

PHCP Advanced Anatomy and Radiographs ? Tennessee (16 CE)

Magna Vista Farm

09:00 AM - 05:00 PM EST

Lorie Fleenor,

bdfandltf@gmail.com

Approved for 8 CE per day for a total of 16 CE

This clinic fulfills the PHCP radiograph requirement for students enrolled in the training program. You do not have to be a PHCP member to attend.

Day 1 – Advanced Anatomy and Morphology

Dissection and exploration of the internal and external structures of the foot.

We will start with a short review of anatomy, however participants will benefit greatly from having a basic understanding of the internal and external structures of the foot prior to attending.

The dissection will be lead by the instructor but students will be hands on in helping with the the different stages of the dissection. We will pick 2 to 4 hooves that have different morphologies. The number of hooves we dissect may vary depending on what we find and how long we spend with each one. We will compare the differences between healthy and unhealthy structures in each foot. We will learn how to visualize where our internal structures are positioned by reading external landmarks.

Examples of common pathologies we will see may include deep sulcus thrush affecting the frog corium, stretched weak lamina, white line infection, wall cracks, P3 remodeling that is visible externally, wall delamination, abscesses, and thin soles.

Participants will go home with techniques to:

- Assess the health of the soft tissue structures in the back of the foot (digital cushion, lateral cartilages, frog corium).*
- Assess and accurately estimate sole depth and medio-lateral balance.*
- Assess palmar/plantar angles.*
- Pinpoint the center of rotation of the coffin joint.*
- Assess P3 position in relation to toe length.*
- Read wear and loading patterns in untrimmed feet. We will speculate on whether the wear we see is static (postural) vs dynamic (created during movement).*

Day 2 – Radiograph Guided Trimming and Dissection

To participate in day 2 you must attend day 1 of this clinic.

We will use the assessment techniques learned in the advanced anatomy clinic to make trimming decisions. We will do a basic introduction to reading radiographs before we begin the exercise. Feet will be radiographed prior to trimming. Using this information, we will be able to critically assess how our trim impacts the position of the hoof capsule in relation to the bony column. Each participant will then complete a self guided dissection/exploration of their foot.

Prerequisite

Attending a PHCP Anatomy, Trimming and Hoof Protection clinic is highly recommended to get the most out of this clinic.

Paige Poss and Jenny Edward's Anatomy of the Equine online hoof course is recommended for beginners and professionals.

Accommodations

I highly recommend staying in downtown Bristol for the best food and entertainment options. However, there is a B&B big enough for people to share across the fence from my farm (walking distance to my shop). There are also cheaper hotel options 20 minutes away with food close by. Three options on West State Street, Bristol, TN and two options on Linden Drive, Bristol, VA.

Day 1, Advanced Anatomy and Morphology, may be purchased and attended on its own. To attend day 2, Radiograph Guided Trimming and Dissection, you must attend day 1.

Certified Practitioners auditing will receive 4 CE credits per day.

Cancellations made one month in advance of the clinic start date will receive a full refund. Between a month out and two weeks in advance of the clinic, cancellations will receive a 50% refund.

If the clinic is cancelled for any reason the student will receive a full refund. Purchasing refundable airline tickets is recommended.

Central Carolina Farrier Rounds (3 CE)

See attached description

, NC

06:00 PM - 09:00 PM EST

Joe Eisen, (919) 408-7268

joe.eisen@outlook.com

Third Wednesday each month, so for 2025: 3/19, 4/16, 5/21, 6/18, 7/16, 8/20, 9/17, 10/15, 11/19, 12/17.

Central NC clinic location rotates monthly, including Chapel Hill, New Hill, Southern Pines, Wake Forest. See monthly announcement in <https://www.facebook.com/groups/978968283546217>

A DVM/Farrier/Owner Team provides an equine case in need of podiatry-related ideas. The examinations, radiography and dinner are gratis; the owner makes their own financial arrangement with their farrier. The meeting is from 6 PM to 9PM. While everyone is settling in & getting some food and drink there is a general topic of discussion for farriers and veterinarians' joint interest. For example, on 10/19/2023 the presentation and discussion was on considerations for shoeing for landing versus loading.,

Then, the horse's owner, veterinarian and farrier provide a medical history. The group will observe the horse in motion in the aisle, arena and/or driveway. Next the group does a podiatry examination followed by Dr. Radkin doing podiatry radiographs for the group to discuss. Then a trimming and possible shoeing plan is discussed. The consensus plan approved by the owner and the owner's farrier is then accomplished by the owner's farrier. Follow-up radiographs will be discussed. There will be one case each evening. The end time is no later than 9PM.

The goal is to see how farriers and equine practitioners work together on a particular case that can then translate to other cases.

February 13, 2026
- February 15, 2026

PHCP Anatomy, Trimming and Hoof Protection ? Florida (21 CE)

09:00 AM - 05:00 PM EST

Jeannean Mercuri,

barefoot@progressivehoofcare.org

This three-day clinic fulfills the Beginner series clinic requirement for PHCP students.

Day 1 – Anatomy and booting

Day 2 – More anatomy and hands-on with cadavers for casting, power tools, and shoe removal

Day 3 – Finish up with cadavers and live trimming (we will cover the first time seeing a client's horse and trimming for the client)

Some of the topics covered:

Basic distal limb anatomy

Exploration of anatomy through cadaver trimming and dissection

Trimming with power tools and grinder safety

Shoe removal for ease and comfort to both horse and trimmer

Transitioning to barefoot

Alternative forms of hoof protection

Fit and use of a wide variety of boots including Equine Fusions, Scoot Boots, Renegades, Soft Rides, Cavallo, EasyCare and more, based on performance, rehab or rider needs (glue on protection is not included at this clinic)

How and when to use hoof casting

Which padding options to utilize for various pathologies and rehab needs

How to perform modifications and repairs to hoof boots

Casting on cadavers

Booting on live horses

Prerequisites:

Read through the PHCP Introduction to Equine Diet and Lifestyle.

Study the PHCP Introduction to Equine Hoof Anatomy.

Visit Anatomy of the Equine to get familiar with the distal limb anatomy before you attend the clinic. Consider purchasing online coursework and ebooks.

What to bring:

If possible, students should bring their own tools (gloves, apron, nippers, rasp, knife, hoof pick, shoe pullers, and stand) but we will have some to share.

If you have a cadaver leg of your own that you would like to dissect, please let us know and bring it along. Cadaver legs are getting hard to come by and can be quite expensive, so if you have access to some we would be grateful.

Accommodations:

Jeannean Mercuri will send out an email with all of the information regarding the event address, travel, lodging, meals, and more prior to the clinic. If you have questions, please contact Jeannean at 631-434-5032 or email at neanpiggy@me.com.

Travel:

Tampa, Orlando, and Gainesville airports are the closest options for the destination.

Clinician:

Jeannean Mercuri, The Hoof Fairy, lives on Long Island where she operates her hoof care business. She began her journey into barefoot trimming in 2001 and joined PHCP

in 2009, becoming a Practitioner, Mentor, and Clinician as well as the Director of Education (until 2023). Teaching and continuing her own education are Jeannean's passions. Years of working with Gerdas Equine Rescue in Vermont, and referrals from local veterinarians on the tough founder cases, have given her extensive experience with hoof protection in rehab work as well as for clients needing hoof boots for everyday riding.

Sign up:

Auditing will not fulfill the beginning series anatomy class requirement.

Cancellations made one month in advance of the clinic start date will receive a full refund. Between a month out and two weeks in advance of the clinic, cancellations will receive a 50% refund.

If the clinic is cancelled for any reason the student will receive a full refund. Purchasing refundable airline tickets is recommended.
