Central Carolina Farrier Rounds (3 CE)

See attached description
, NC

06:00 PM - 09:00 PM EST
Joe Eisen, (919) 408-7268
joe.eisen@outlook.com

Third Wednesday each month, so for 2025: 3/19, 4/16, 5/21, 6/18, 7/16, 8/20, 9/17, 10/15, 11/19, 12/17.

Central NC clinic location rotates monthly, including Chapel Hill, New Hill, Southern Pines, Wake Forest. See monthly announcement in <https://www.facebook.com/groups/978968283546217>

A DVM/Farrier/Owner Team provides an equine case in need of podiatry-related ideas. The examinations, radiography and dinner are gratis; the owner makes their own financial arrangement with their farrier. The meeting is from 6 PM to 9PM. While everyone is settling in & getting some food and drink there is a general topic of discussion for farriers and veterinarians' joint interest. For example, on 10/19/2023 the presentation and discussion was on considerations for shoeing for landing versus loading.,

Then, the horse's owner, veterinarian and farrier provide a medical history. The group will observe the horse in motion in the aisle, arena and/or driveway. Next the group does a podiatry examination followed by Dr. Radkin doing podiatry radiographs for the group to discuss. Then a trimming and possible shoeing plan is discussed. The consensus plan approved by the owner and the owner's farrier is then accomplished by the owner's farrier. Follow-up radiographs will be discussed. There will be one case each evening. The end time is no later than 9PM.

The goal is to see how farriers and equine practitioners work together on a particular case that can then translate to other cases.

IAPF Fall Farrier Expo (17 CE)
Missouri Forget-Me-Not Horse Rescue & Sanctuary
981 Heritage Road
Linn Creek, Mo 65052
02:00 PM - 05:00 PM CST
Mark Male,
markmalehorseshoeing@gmail.com
Event Description:

Join the International Association of Professional Farriers (IAPF) and Missouri Forget-Me-Not Horse Rescue & Sanctuary for the Fall Farrier Expo, taking place October 3–5, 2025. Sponsored by Glue-U Adhesives and Werkman Hoofcare, this three-day educational event brings together farriers, veterinarians, and equine professionals for a dynamic lineup of presentations, live demonstrations, and hands-on workshops.

Kick off Friday afternoon with a series of engaging one-hour presentations featuring industry experts covering topics from shoe modification credentials to GluShu applications and veterinary insights.

Saturday is Demonstration Day, where you'll observe live demos including advanced shoeing techniques, glue-on technology, and collaborative vet-farrier care approaches—plus an interactive lunch break for networking.

Sunday wraps up with small group, 30 minute hands-on sessions rotating through specialized stations for in-depth learning and practical skill-building with each presenter.

Whether you're looking to expand your technical knowledge or connect with professionals in the field, the Fall Farrier Expo offers valuable continuing education in a supportive and collaborative environment.

October 4, 2025

Sweet River Equine Clinic, Inc. (6.5 CE)
Sweet River Equine Clinic, Inc.
200 Weyer Rd
Modeseto, CA 95357
08:00 AM - 05:00 PM PST
Brianna Esau, (209) 324-1249
briannasweetriver@gmail.com

We will have Doug Russo here on October 4. Our entire staff works that day to make sure the event is very efficient and professional for the farriers. We coordinate with clients and outside sources to secure horses to use to demonstrate on during the event. Please let me know if you have any further questions. See flyer for additional information.

2025 Silver Jubilee NO Laminitis! Conference (25 CE)

Via Zoom

08:00 AM - 05:45 PM CST

Nancy Collins, 603-986-8938

ncollins@ecirgroup.org

Virtual via Zoom. Live event with recordings for future view. See attachment for further details.

The US alone has almost 10 million horses. The most current estimates are that 10% to 15% of horses will suffer from laminitis every year. In the US, that is 1 million horses per year. The ECIR Group has been there to help caregivers and their equines for 25 years, researching, educating, and helping equines negotiate rehabilitation from or avoidance of debilitating laminitis.

The 2025 Jubilee NO Laminitis! Conference will be a special celebration of the 25 years that the ECIR Group has remained the largest field-trial database for Pituitary Pars Intermedia Dysfunction (PPID) and Equine Metabolic Syndrome (EMS)/Insulin Resistance (IR) in the world, dedicated to the quest of helping metabolic equines. Attendees will welcome the latest in research and proven protocols used to improve the welfare of equines in their care. Join the ECIR Group, Drs. Kellon, Bowker, Gustafson and 10 top-level equine researchers and professionals in the ECIR Group Virtual Conference Room via Zoom[®] offering three days of information live, and with recordings for future review.

PHCP Anatomy, Trimming and Hoof Protection ? Tennessee (24 CE)

Magna Vista Farm

09:00 AM - 06:00 PM EST

Lorie Fleenor,

bdfandltf@gmail.com

Approved for 8 CE per day for a total of 24 CE

This three-day clinic fulfills the beginner series clinic requirement for PHCP students.

Anyone can attend, you do not have to be a PHCP member.

Days 1 and 2 will cover anatomy and trimming.

Day 3 will cover pathology, hoof protection and shoe removal.

Some of the topics covered include the following:

- Basic distal limb anatomy*
- Exploration of anatomy through cadaver trimming and dissection*
- Shoe removal for ease and comfort to both horse and trimmer*
- Transitioning to barefoot*
- Alternative forms of hoof protection*
- Fit and use of a variety of hoof boots, based on performance, rehab or rider needs (glue on protection is not included in this clinic)*
- How and when to use hoof casting*
- Which padding options to utilize for various pathologies and rehab needs*
- Casting and booting on cadaver limbs*

Prerequisite

Read through the PHCP Introduction to Equine Diet and Lifestyle.

Study the PHCP Introduction to Equine Hoof Anatomy.

Visit Anatomy of the Equine to get familiar with the distal limb anatomy before you attend the clinic. Consider purchasing online coursework and ebooks.

What to bring

Most of this clinic will take place in a heated shop. A small portion of the time will be in the barn working with live horses, so please dress appropriately. Bring a chair or let me know if you need one. Bring your trimming tools if you are able, an apron or towel for your lap, gloves and safety glasses.

If you have a cadaver leg of your own you would like to dissect with us please let us know and bring it along.

There will be a one hour lunch break. You may bring your own lunch to eat on location or there is a diner 3 miles down the road.

Accommodations

I highly recommend staying in downtown Bristol for the best food and entertainment options. However, there is a B&B large enough for people to share across the fence from my farm (walking distance to my shop). There are also cheaper hotel options 20 minutes away with food close by. Three options on West State Street, Bristol, TN and two options on Linden Drive, Bristol, VA.

Travel

People should consider flying into TRI airport and be prepared to rent a car. We are in the country so Uber will be expensive or unrealistic.

Start time is 9:00 am each day and we'll finish up between 4:00 and 5:00 pm.

Lorie Fleenor, PHCP practitioner, mentor and clinician, is an 8th generation farmer in Bristol, TN. Knowledge of animal welfare has always been a priority for Lorie, and whole horse hoof care has been her passion since she first learned to trim in 2007. She continues her education so that she can better help people and horses find a pathway to health and happy trails. Each year, Lorie hosts multiple clinics at her ranch for riding and hoof care, and is very active in her local horse community. Her husband and two children help her on the farm where they run a 265 head cattle operation, board and care for 75 horses, teach riding, and offer training services. She serves clients in Southwest VA and Northeast TN. She has a huge variety of horses, hooves, and pathologies on her farm. The horses live out 24/7 in herds on hilly pastures, so it's fun to watch rehab and healthy hooves happen as new horses come in! As we all know, diet, exercise and the trim go hand in hand!

Lorie can be contacted at Magna Vista Farm in Bristol, TN (bdfandltf@gmail.com).

November 15, 2025
- November 16, 2025

PHCP Advanced Anatomy and Radiographs ? Tennessee (16 CE)

Magna Vista Farm

09:00 AM - 05:00 PM EST

Lorie Fleenor,

bdfandltf@gmail.com

Approved for 8 CE per day for a total of 16 CE

This clinic fulfills the PHCP radiograph requirement for students enrolled in the training program. You do not have to be a PHCP member to attend.

Day 1 – Advanced Anatomy and Morphology

Dissection and exploration of the internal and external structures of the foot.

We will start with a short review of anatomy, however participants will benefit greatly from having a basic understanding of the internal and external structures of the foot prior to attending.

The dissection will be lead by the instructor but students will be hands on in helping with the the different stages of the dissection. We will pick 2 to 4 hooves that have different morphologies. The number of hooves we dissect may vary depending on what we find and how long we spend with each one. We will compare the differences between healthy and unhealthy structures in each foot. We will learn how to visualize where our internal structures are positioned by reading external landmarks.

Examples of common pathologies we will see may include deep sulcus thrush affecting the frog corium, stretched weak lamina, white line infection, wall cracks, P3 remodeling that is visible externally, wall delamination, abscesses, and thin soles.

Participants will go home with techniques to:

- Assess the health of the soft tissue structures in the back of the foot (digital cushion, lateral cartilages, frog corium).*
- Assess and accurately estimate sole depth and medio-lateral balance.*
- Assess palmar/plantar angles.*
- Pinpoint the center of rotation of the coffin joint.*
- Assess P3 position in relation to toe length.*
- Read wear and loading patterns in untrimmed feet. We will speculate on whether the wear we see is static (postural) vs dynamic (created during movement).*

Day 2 – Radiograph Guided Trimming and Dissection

To participate in day 2 you must attend day 1 of this clinic.

We will use the assessment techniques learned in the advanced anatomy clinic to make trimming decisions. We will do a basic introduction to reading radiographs before we begin the exercise. Feet will be radiographed prior to trimming. Using this information, we will be able to critically assess how our trim impacts the position of the hoof capsule in relation to the bony column. Each participant will then complete a self guided dissection/exploration of their foot.

Prerequisite

Attending a PHCP Anatomy, Trimming and Hoof Protection clinic is highly recommended to get the most out of this clinic.

Paige Poss and Jenny Edward's Anatomy of the Equine online hoof course is recommended for beginners and professionals.

Accommodations

I highly recommend staying in downtown Bristol for the best food and entertainment options. However, there is a B&B big enough for people to share across the fence from my farm (walking distance to my shop). There are also cheaper hotel options 20 minutes away with food close by.
